No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1981 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 114

NUMBER 1, JUNE 1981

CARBOHYDRATES

A Rapid and Sensitive Method for the Determination of Monosaccharides as Their Dansyl Hydrazones by High-Performance Liquid Chromatography
William F. Alpenfels 153

CELL CULTURE

Quantification of Cell Death in Human Fibroblasts by Measuring the Loss of [^{14}C]Thymidine from Prelabeled Cell Monolayers
Robert H. Eckel and Wilfred Y. Fujimoto 118

CELL SEPARATION

Purification of *Dictyostelium discoideum* Spores by Centrifugation in Percoll Density Gradients with Retention of Morphological and Biochemical Integrity
Kathleen A. Killick 46

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

Quantitative Studies of Ion-Exchange and Affinity Elution Chromatography of Enzymes *Robert K. Scopes* 8

Reverse-Phase High-Pressure Liquid Chromatography of Uridine Diphosphate *N*-Acetylmuramyl Peptide Precursors of Bacterial Cell Wall Peptidoglycan
Bernard Flouret, Dominique Mengin-Lecreulx, and Jean van Heijenoort 59

Rapid Quantitation of Desmosine Content in Tissue Hydrolysates by High-Performance Liquid Chromatography *Barbara Faris, Rocco Ferrera, Michael Glembourtt, Peter J. Mogayzel, Jr., George Crombie, and Carl Franzblau* 71

Fractionation of Simian Virus 40 DNA Fragments by RPC-5 Column Chromatography *Minou Bina, Michael F. Radonovich, and Bruce A. Roe* 105

A Recycling Gel Partition Technique for the Study of Protein-Ligand Interactions: The Binding of Methyl Orange to Bovine Serum Albumin
Christopher L. Ford and Donald J. Winzor 146

Two New Methods for pH Gradient Engineering in Isoelectric Focusing Illustrated by Increased Resolution between Hemoglobin A_1 and A_{1c}
Torgay Låås and Ingmar Olsson 167

ENZYMATIC ASSAYS AND ANALYSES

Assay of Dolichol Monophosphate and Dolichol Diphosphate Phosphatases: Thin-Layer Chromatography in a Nonequilibrated System
Daniel O. Boscoboinik and Enrique Belocopitow 42

Phospholipase A_2 Activity of Post-Heparin Plasma: A Rapid and Sensitive Assay and Partial Characterization *K. M. Mohamed Shakir* 64

High-Pressure Liquid Chromatography for Assaying Several Plant Phenolic Enzymes
Denise E. Blume and James A. Saunders 97

A Photometric Assay for the Initial Rate of the Cyclization Reaction Catalyzed by the Cyclodextrin Glycosyltransferase *Hans Bender* 158

INSTRUMENTATION

A Simple Program Which Processes Liquid Scintillation Counting Data from Samples Containing Both ^{125}I and ^{3}H under Conditions of Varying Quench
Vern D. Winston, Dennis K. Anderson, and Richard A. Consigli 32

MEMBRANES AND RECEPTORS

Interaction of Tritiated β-Endorphin with Rat Brain Membranes
R. Glenn Hammonds, Jr., Nicholas Ling, and David Puett 75

Photopigment Content of Isolated Bovine Disk Membrane Vesicles
Eric J. Amis, Deborah A. Davenport, and Hyuk Yu 85

An Improved Swinging-Bucket Ultracentrifugal Filter for Receptor-Binding Assays
Robert Freundlich and Dermot B. Taylor 103

METABOLITE DETERMINATION

A New Highly Sensitive Assay for Breath Acetaldehyde: Detection of Endogenous Levels in Humans
John R. Dannecker, Jr., Edward G. Shaskan, and Michael Phillips 1

Gas Chromatography–Mass Spectrometry Determination of [^{15}N]Ammonia Enrichment in Blood and Urine *Itzhak Nissim, Marc Yudkoff, William Yang, Thomas Terwilliger, and Stanton Segal* 125

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

The Identification and Analysis of Nucleotides Bound to the Elongation Factor Tu from *Escherichia coli* *Wolfgang Block and Alfred Pingoud* 112

A Rapid Boiling Method for the Preparation of Bacterial Plasmids
David S. Holmes and Michael Quigley 193

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

Improved Spectrophotometric Methods for the Assay of Carbodiimides
Andrew Williams, Steven V. Hill, and Ibrahim T. Ibrahim 173

PROTEIN ANALYSES AND REAGENTS

Glycoprotein Molecular-Weight Estimation Using Sodium Dodecyl Sulfate–Pore Gradient Electrophoresis: Comparison of Tris–Glycine and Tris–Borate–EDTA Buffer Systems *Joseph F. Poduslo* 131

PURIFICATION OF ENZYMES AND PROTEINS

Purification of Some Tricarboxylic Acid Cycle Enzymes from Beef Heart Using Affinity Elution Chromatography *Jeffrey R. Davies and Robert K. Scopes* 19

Rapid Purification of Human Placental Aldose Reductase
Peter F. Kador, Debor Carper, and Jin H. Kinoshita 53

The Purification of Avidin and Its Derivatives on 2-Iminobiotin-6-aminohexyl–Sepharose 4B *Gayle Heney and George A. Orr* 92

Purification of Rat Liver Asparagine Synthetase by Affinity Chromatography on Reactive Blue 2-Agarose *Shigeki Hongo and Tsuneo Sato* 163

Affinity Chromatography of *Pseudomonas* Salicylate Hydroxylase
Kwan-sa You and Charles R. Roe 177
Large-Scale Purification of Halophilic Enzymes by Salting-Out Mediated Chromatography *W. Leicht and S. Pundak* 186

SPECIAL TECHNIQUES

A Liquid Scintillation Counting Method that Allows Recovery of Compounds in High Yield for Further Analysis *Roy Saffhill* 28

VITAMINS, COENZYMES, AND NUCLEOTIDES

A Simple Direct Spectrophometric Assay for 24,25-Dihydroxyvitamin D_3
Barbara E. Dreyer and David B. P. Goodman 37
Quantitative Analysis of Ascorbic Acid and Dehydroascorbic Acid by High-Performance Liquid Chromatography *Richard C. Rose and David L. Nahrwold* 140

NUMBER 2, JULY 1, 1981

REVIEW

Fluorescence Quenching Studies with Proteins
Maurice R. Eftink and Camillo A. Ghiron 199

CARBOHYDRATES

Separation of Neutral Oligosaccharides by High-Performance Liquid Chromatography *Scott J. Mellis and Jacques U. Baenziger* 276
A Gas Chromatographic Method for the Quantitative Determination of Hexuronic Acids in Alginic Acid *Laszlo Vadas, Harry S. Prihar, Balappa K. Pugashetti, and David Sidney Feingold* 294

CELL CULTURE

Growth of Mouse Plasmacytoma Cells in Serum-Free, Hormone-Supplemented Medium: Procedure for the Determination of Hormone and Growth Factor Requirements for Cell Growth
Hiroki Murakami, Hideo Masui, Gordon Sato, and William C. Raschke 422

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

Purification of Supercoiled DNA of Plasmid Col E1 by RPC-5 Chromatography
Audrey N. Best, David P. Allison and G. David Novelli 235
A Unifying Model for the Ionic Composition of Steady-State Electrophoresis Systems
C. Schafer-Nielsen and P. Just Svendsen 244
Influence of the Composition of Commercial Sodium Dodecyl Sulfate Preparations on the Separation of α- and β-Tubulin during Polyacrylamide Gel Electrophoresis
D. Best, P. J. Warr, and K. Gull 281
Improved Retention of Heme with Increased Resolution of Microsomal Proteins in Polyacrylamide Gel Electrophoresis *Jacqueline F. Sinclair, John F. Healey, Russ McAllister, Herbert L. Bonkowsky, and Peter R. Sinclair* 316

Separation of Poly(ADP-Ribosylated) Nuclear Proteins by Polyacrylamide Gel Electrophoresis at Acidic pH and Low Temperature
V. T. Dam, G. Faribault, and G. G. Poirier 330
Electrophoresis in Density Gradients of Metrizamide
Philip Serwer and Robert H. Watson 342
High-Performance Liquid Chromatography of the Plastid Pigments and Some of Their Immediate Derivatives *S. Burke and S. Aronoff* 367
Determination of γ-Carboxyglutamic Acid in Human Urine by Gas–Liquid Chromatography *Shiro Matsu-ura, Shigeo Yamamoto, and Masami Makita* 371
Comparison of Crosslinked and Natural Polypeptides as Standards for Molecular Weight Determination of Large Polypeptides (Guinea Pig Thyroglobulin) by SDS–Gel Electrophoresis
Yew Phew See, Heather Jones, and Gerard N. Burrow 377
High-Performance Gel Permeation Chromatography of Proteins in Denaturing Solvents and its Application to the Analysis of Enveloped Virus Polypeptides
R. C. Montelaro, M. West, and C. J. Issel 398
Determination of Dipicolinic Acid by High-Pressure Liquid Chromatography
Henry Paulus 407

DRUG ANALYSIS

In Vitro Penicillin Aminolysis: Application to a Radioimmunoassay of Trace Amounts of Penicillin *Jean-Michel Wal and Georges F. Bories* 263
Assay for Methotrexate in Nanomolar Concentrations with Simultaneous Detection of Citrovorum Factor and Vincristine
William M. Deen, Peter F. Levy, James Wei, and Randall D. Partridge 355
A Simple, Rapid Assay for Cysteamine and Other Thiols
Adam J. Jonas and Jerry A. Schneider 429

ENZYMATIC ASSAYS AND ANALYSES

Analysis of Dual Transport Systems by Means of Hill Plots *N. A. Peterson* 322
Choice of Buffer Anion for the Assay of Adenosine 5′-Triphosphate Using Firefly Luciferase *Wright W. Nichols, G. D. W. Curtis, and H. H. Johnston* 396
The Identity and Properties of Firefly Luciferase Inhibitors in Urine
Wright W. Nichols, G. D. W. Curtis, and H. H. Johnston 433

HORMONES

An Enzyme Immunoassay for Human Follicle-Stimulating Hormone
James A. Dias, William J. Driskell, and Leo E. Reichert, Jr. 268
The Combined Determination of Indolyl-3-acetic and Abscisic Acids in Plant Materials *Erik Knegt, Evert Vermeer, and Johan Bruinsma* 362

INSTRUMENTATION

Calcium Measurement: Picomole Quantitation by Continuous-Flow Colorimetry
Gerald G. Vurek 288
Easy-to-Use Equipment for the Accurate Microinjection of Nanoliter Volumes into the Nuclei of Amphibian Oocytes *Donald L. Stephens, Timothy J. Miller, Louise Silver, David Zipser, and Janet E. Mertz* 299

METABOLITE DETERMINATION

A Sensitive Radioenzymatic Assay for ATP
Constancio Gonzalez and Javier Garcia-Sancho 285

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

The Separation and Amino Acid Analysis of Collagen Crosslinks on an Extended Basic Ion-Exchange Column *Timothy J. Housley and Marvin L. Tanzer* 310

Analysis of Biological Thiols: Derivatization with Monobromobimane and Separation by Reverse-Phase High-Performance Liquid Chromatography
Gerald L. Newton, Randel Dorian, and Robert C. Fahey 383

Assay of γ-Carboxyglutamate in Tissue and Body Fluid by Selective Hydrolysis and Amino Acid Analysis *Yoshinori Ishikawa and Roy E. Wuthier* 388

A Highly Sensitive Colorimetric Method for the Determination of Carbodiimides
Meir Wilchek, Talia Miron, and Joachim Kohn 419

PHYSICAL TECHNIQUES

Time-Dependent Total Extinction Analysis for Simple Reactions Involving Intermediates *David A. Deranleau and Daniel Dubler* 411

Measurement of Transmembrane pH Gradients in Human Erythrocytes Using ^{19}F NMR
June S. Taylor, Carol Deutsch, George G. McDonald, and David F. Wilson 415

PROTEIN ANALYSES AND REAGENTS

A Sensitive Assay for Proteins and Biliproteins
Rami Almog and Donald S. Berns 336

SPECIAL TECHNIQUES

A Method for the Measurement of Sulfur-34 Abundance in Bound Cysteine and Methionine *Robert H. White* 349

SUBCELLULAR FRACTIONS AND SEPARATION

Murine Leukemic Lymphoblasts: Homogenization and Fractionation Procedures for Plasma Membrane Vesicles Isolation
M. Torrent-Quetglas, M. P. Rivera-Fillat, and M. R. Grau-Oliete 228

ERRATUM

Volume 107, Number 2, September 15, 1980: Hiroshi Sanemori, Hiroaki Ueki, and Takashi Kawasaki, "Reversed-Phase High-Performance Liquid Chromatographic Analysis of Thiamine Phosphate Esters at Subpicomole Levels," pp. 451–455 441

AUTHOR INDEX FOR VOLUME 114 442

The Subject Index for Volume 114 will appear in the December 1981 issue as part of a cumulative index for the year 1981.

INFORMATION FOR AUTHORS[1]

Analytical Biochemistry will publish articles on methods of interest to the biochemical sciences and all fields that impinge on biochemical investigation, including those areas of immunology that include analytical and preparative methods for application by biochemists, cell and tissue culture techniques, and purification methods for specific enzymes and other proteins when such work has resulted in a high level of purity. Areas such as methods for sequencing and synthesizing DNA and RNA will be included. Invited review articles dealing with timely topics in methodology will also be published. In addition, book reviews covering titles directly related to the scope of the Journal and, specifically, to analytical and preparative methods in biochemistry and such impinging fields as immunology and tissue culture, will be published.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, Seventh Floor, 1250 Sixth Avenue, San Diego, California 92101.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures (originals or glossy prints) and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about 8½ × 11 inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and the address to which proof should be mailed. **Also, on the title page, authors should indicate the appropriate subject category for listing in the Table of Contents.** Please number all pages of the manuscript.

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the extended Information for Authors, appearing in the first issue of each year of this journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is 8½ × 11 inches (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black. Glossy prints properly prepared are acceptable.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at the bottom of the page containing the table.

---

[1] An extended Information for Authors will be published in an early 1981 issue. Reprints are available from the Editorial Office. Authors should consult this Information for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **125,** 255–260.
2. Metzler, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds), Vol. 4, pp. 246–409, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge. Additional reprints may be ordered on the form provided.
